ibd SOI [O80]

#A1 : User
Activation
Functionalities are available x s after switch on [R001]

#A1 : User
switch off
The system can be switched off at any time, in any state. [R003]

Customer performance

#A1 : User
Service FS1
the service xx is realized with the following performance level : TBD in condition TBD [R009]
the service xx is realized with the following performance level : TBD in condition TBD [R010]
the service xx is realized with the following performance level : TBD in condition TBD [R011]

#A1 : User
Service FS2
the service xx is realized with the following performance level : TBD in condition TBD [R012]
the service xx is realized with the following performance level : TBD in condition TBD [R013]
the service xx is realized with the following performance level : TBD in condition TBD [R014]

#A1 : User
Service FS3
the service xx is realized with the following performance level : TBD in condition TBD [R015]
the service xx is realized with the following performance level : TBD in condition TBD [R016]
the service xx is realized with the following performance level : TBD in condition TBD [R017]

Users expect performance and functional characteristics. These are displayed in this diagram.
